

Titan Series

Ultimate Strength and Durability

Arenas • Schools • Convention Centers
Locker Rooms • Places of Worship

Titan Series

Clarín's Titan Series delivers a new standard of strength and durability to our line of quality folding chairs. The Titan Series features the placement of additional support components at critical chair stress points to hold more weight. The Titan's added frame strength lets you offer more seating support to those who need it.

Features

The Titan features the same Clarín construction and design that you would expect plus an added level of frame support. Clarín's engineers have added:

- **Extended Leg Reinforcement**
- **Two Extra Leg Stretchers**
- **"X" Frame Reinforcements**
- **Modified Seat Frame**
- **Hinge Reinforcements**
- **Seat Cross Brace:** located under the seat
- Strong enough for a person weighing up to **350 lbs**

Options

- **"A" or "B" Back** design ("B" back shown)
- **Standard or Erect Pitch:** erect pitch reduces front-to-back spacing for increased floor capacity
- **Interbracket Ganging Devices:** allow for quick and secure interlocking of chairs
- **Vinyl or Fabric upholstery** (visit www.clarinseating.com to view swatches)
- **Screen printed or embroidered logos** on seat and backrest
- A variety of storage trucks available

Locker Room Chairs

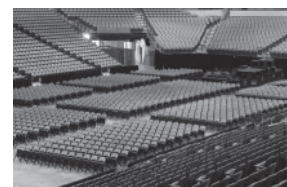

Professional sport franchises, college and high school teams use the Titan Series in locker rooms and training facilities in order to deliver more support for their athletes.

New England Patriots Locker Room

Similar Appearance

The similar appearance of the Titan Series to other Clarín models enables venues to place them around standard models without interrupting the venue's seating appearance.

American Airlines Center

Available Models

Standard	Wide (1-1/2" Wider Seat)
3400HD	3-3400HD
3401HD	3-3401HD with one arm
3402HD	3-3402HD with two arms

Warranty Details: 8-year frame warranty subject to terms and conditions of Clarín's standard warranty - including without limitation the exclusions for misuse and abuse.

Testing Details: Test results from an independent third party tested the Titan in accordance with applicable ANSI/BIFMA testing standards modified for additional load requirement.
